

ADEPTICON 2024

MARCH 20TH – 24TH :: RENAISSANCE SCHAUMBURG

ADEPTICON 2024 40K TERRAIN ANNOUNCEMENT!

Providing 128+ of the most beautiful 40K tables to be found is a never-ending labor of love that has taken up (truly) countless hours and generated much angst from our significant others. It can make you feel at times like the masses of plastic bins and thousands of terrain pieces are a second family (perhaps the one you actually want to spend the holidays with).

Given our attachment to the twenty years' worth of work, we are very excited to announce that in 2024, *AdeptiCon will be using a modified version of the Games Workshop fixed terrain layouts from the 40K Leviathan Tournament Companion.*

WHY THE CHANGE?

Most of us volunteering for AdeptiCon count our 40K career in decades. That means we have seen many tournament formats (both missions and terrain) come, go and compete over the years. This has led to fractious and regional metas for most of the life of 40K that made traveling and cooperation difficult among the tournament scene.

With Games Workshop's triumphant return to the world of organized 40K, and the release of the Leviathan Tournament Companion, the dream of a worldwide standard for organized 40K is finally within grasp. And we want to do our part in making that dream a reality.

Plus, the terrain layouts *make for fair and fun games!*

WHAT'S THE SAME AS LEVIATHAN?

Every Warhammer 40K table at AdeptiCon will use one of the four sanctioned terrain layouts from the Leviathan Tournament Companion. ***The number, size and location of the bases will be the same as in the companion.*** And ***all bases will block LoS*** as if they were topped with Ruins.

WHAT'S MODIFIED/DIFFERENT FROM LEVIATHAN?

Due to the various terrain types in our collection, we will be using different terrain elements on top of some of the 12"x6", 10"x5" and 6"x4" bases used in the layouts. For example, some of the small 6"x4" bases may be topped with armored containers. And some of the large 12"x6" bases may be topped with foam rock hills.

Exact details on how to interact with these more varied elements on top of the terrain bases will be coming in an ***AdeptiCon 40K Terrain Packet in February.***

In the meantime, using the Leviathan terrain layouts right out of the Leviathan Tournament Companion will serve you well in practicing for 40K at AdeptiCon 2024.

See you March 20th to the 24th at the Schaumburg Renaissance!
